

One partner.
Total supply chain control.

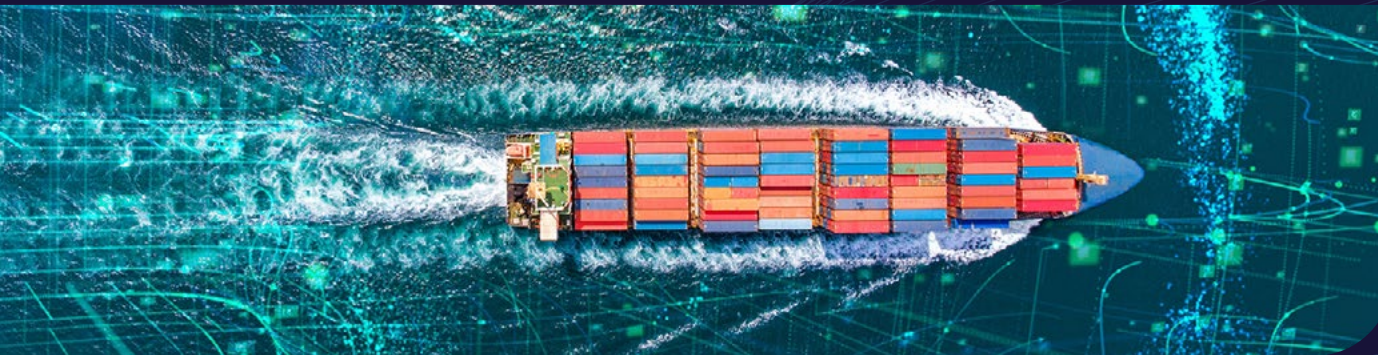

Your managed 4PL partner

A smarter way to run your supply chain

CCL Techlogix Group is a technology-led, service-driven Managed 4PL partner.

As a Managed 4PL, we blend expert people, our own unified Transport Management System (TMS), and a carrier-neutral approach to run your inbound, outbound or complete logistics flow.

We believe supply chains run best when **people, technology and choice work together.**

Inbound, outbound and returns - supply chains are complex, and since 2019, disruption has been the norm, not the exception.

Complex supply chains often involve multiple carriers and disconnected systems, leading to inefficient manual work and errors.

Multiple carriers with limited visibility create data silos and separate processes resulting in slower reaction times and fragmented data analysis.

Rising costs and sustainability pressure are amplified by disjointed operations.

With CCL as your Managed 4PL, you have instant access to a world of carrier choice, harmonised through one technology platform, myCCL, and supported by our teams of logistics experts.

Managed 4PL explained

We provide the strategic foundation for complex logistics, combining expert insight, innovative technology and carrier choice to streamline operations, reduce cost and improve visibility.

The CCL difference: a smarter, more human way to run your logistics

We design our service around your business needs, giving you greater control and more time to work on your business.

People

Responsive, knowledgeable support with industry-leading response times

Technology

myCCL, a powerful TMS that brings visibility and decisions together

Choice

A fully carrier-agnostic model giving you flexibility, resilience and commercial advantage

One connected supply chain

The result?
More time to grow your business.

myCCL™ Transport Management System

The engine behind a smarter, more resilient supply chain.

With myCCL, customers can plan, execute and optimise every shipment, across carriers, modes and regions all from one platform.

Modular, cloud-based and built to integrate seamlessly with your systems and processes.

Execution → Visibility → Intelligence

myCCL – one platform, endless possibilities

One partner, a world of choice

We work across all modes of transport, partnering with thousands of logistics providers worldwide.

Leverage your logistics spend across multiple carriers by partnering with CCL.

Enjoy the efficiencies of vendor consolidation, without ever limiting your choices.

Inbound → Outbound → Returns

Explore leveraged logistics choice with CCL

Who we work with

From lemonade stands to multinationals, we partner with scaling and enterprise businesses to bring people, technology and carrier choice together in one coordinated logistics model. Delivering complete shipment visibility, operational control and continuous performance improvement at scale.

Scaling Companies

Growth is exciting - until logistics starts to creak. What worked yesterday can quickly become a constraint on tomorrow's growth.

Enterprise Companies

Supply chains fail when accountability, governance and decision-making are fragmented.

With two commercial models, based around volume, spend and complexity, we work with you to build the right solution for your business need.

“CCL as our 4PL partner, is a trusted extension of our logistics team, delivering performance, data visibility, and value at every step. They share our values and are always aligned to our business goals and objectives.”

Richard Eden, Supply Chain Director, Assa Abloy UK

All your Scope 3 emissions on one platform

With myCCL it's never been easier to measure, manage & minimise your carbon footprint.

Technology provides the insight –
People deliver the outcome

Measure
Manage
Minimise

Using myCCL for your logistics shipments means your data is consistently formatted and securely stored within one platform.

Our embedded carbon tracker algorithms calculate the transportation and distribution emissions for each shipment across your supply chain.

Emissions calculations are aligned to ISO 14083, with full GLEC certification, so you can report on your Scope 3 emissions with confidence.

Generate overall company emissions statements or individual company reports directly from myCCL.

Helping you make greener choices

Delivering Happiness is not just a slogan – it's our guiding purpose, rooted in everything we value.

It signifies a three-way promise: to do right by our customers, build trust with our suppliers, and take care of our people.

By leading with integrity, service, and a people-first mindset, we turn intent into impact. The result is stronger partnerships, better outcomes, and a business where success is shared and happiness is delivered.

“When we act with integrity and genuinely care for those we serve and work with, we deliver more than solutions - we deliver happiness.”

Callum Bastock, CEO, CCL Techlogix Group
